

SIENG LYHENG

Applied Math & Statistics Student | Data Science

About Me

I recently completed Year 3 in Data Science student at ITC with a good foundation in data science, including skills in both data analysis and machine learning. I am actively seeking an internship opportunity where I can gain hands-on experience, contribute to a professional team, and develop practical skills in a real-world working environment. I am passionate about continuous learning and excited to apply my academic knowledge to meaningful challenges.

Phnom Penh, Cambodia

Skills

- Programming Languages: C, C++, Python, R Programming, MySQL
- Web Framework: Django (basic)
- Tools & Software: Visual Studio Code, Code::Blocks, MySQL Workbench, Git, Excel
- Soft Skills: Problem-solving, Teamwork, Communication

Language

- Khmer: Native
- English: Intermediate
- French: Basic

Education

Institute of Technology of Cambodia ENGINEER DEGREE IN APPLIED MATHEMATICS AND STATISTICS 2023-2027 (EXPECTED)

- Completed Year 3, planning to specialize in Data Science in Year 4

Kampot City High school 2017-2022

Projects & Experience

2025

MINI PROJECT – PLATE NUMBER RECOGNITION USING YOLO AND CNN MODEL

- Developing a real-time license plate recognition system using YOLO
- Focused on model training, image annotation, and improving detection accuracy
- Project is approximately 85% complete and is being developed under the ITC-ReDA Lab – Computer Vision and AI Club.

LIBRARY MANAGEMENT SYSTEM USING MYSQL AND DJANGO

- Developed a web-based system with book management and user roles using Django and MySQL
- Implemented key features including data handling, reporting, and user interaction; 95% complete

2024

INFORMAL INTERNSHIP – ITC LIBRARY (2-3 MONTHS)

- Visualized book borrowing and room booking data using Jupyter Notebook and VS Code
- After visualizing the data, I reported findings and insights to the Head of Library
